

Grade: 10

Content: Biology

Unit Topic: Trees of Wisconsin

Essential Question/ Big Idea: Be able to identify different trees found in Wisconsin

Activities:

- Read chapter in text about trees
- Discuss the chapter and address any questions
- Class will go outside and take pictures of different trees and leaves around the school
- Students will use the pictures to make a poster that will demonstrate different ways that will help them remember the names of the trees

Evaluation:

- Participation in picture collection
- Poster with pictures and captions

## Tree Identification

Maple leaves have 3-5 lobes

Jack pine trees have many needles per clump

Oak leaves have many rounded or pointy lobes. Oak trees also have acorns.

Ride pine trees look like fluff balls cover the tree
